

## Maintenance Technician - Bent Water Brewing

Bent Water Brewing, a growing craft beer brewery is in need of a maintenance technician for our brewery. This is an opportunity for a motivated candidate to get into a full time position with growth potential in the beer brewing industry in our Lynn, MA facility.

### Description

The primary responsibility of the Maintenance Technician at Bent Water Brewing is to ensure that all brewery equipment is in proper working order to produce high quality beer. This includes both routine preventative maintenance of brewery equipment and troubleshooting, adjustment and repair of equipment in the event of out of specification operation or breakdowns. Under the direction of the Engineering Manager, the Maintenance Technician will also participate in the assembly and testing of new equipment, data analysis for continuous process improvement.

### Knowledge, Skill and Ability Requirements

- A high school diploma and a minimum of two years experience in an industrial maintenance role or a two year technical degree in a mechanical/electrical field is required
- Good troubleshooting capability and a logical problem-solving approach.
- Exposure or familiarity with mechanical, electrical or pneumatic system operation.
- Good hands-on mechanical ability.
- Ability to read and interpret equipment manuals and schematics. Familiarity with ladder logic and P&I diagrams is a plus.
- Basic knowledge and familiarity with spreadsheet programs.
- Able to self-motivate and work independently
- Good communication and time management skills.
- Welding experience or industrial electrical experience is a plus.

### Responsibilities

- Perform preventative maintenance on all brewery equipment.
- Diagnose equipment failures and make emergency repairs to keep production machinery operating efficiently.
- Work safely and follow all company operating procedures (SOPs).
- Draft and implement new SOPs as required.
- Maintain a clean and orderly workspace and spare parts inventory.
- Work with the Engineering Manager or Director of Operations on the assembly and evaluation of new equipment and processes.
